Note: Revisions to the most recently disclosed dividend forecasts: No

3. Forecasts for Fiscal 2013 (Year Ending March 31, 2013)

(Percentages represent percentage changes compared with the previous fiscal year.)

	Operating reve	enues	Operating in	come	Ordinary in	come	Net incon	ne	Earnings per share— Basic
	Millions of yen	%	Millions of yen	%	Millions of yen	%	Millions of yen	%	Yen
Fiscal 2013	2,651,000	4.7	386,000	7.2	306,000	12.4	174,000	60.0	440.06

Note: Revisions to the most recently disclosed earnings forecasts: No

4. Other

(1) Changes to principal subsidiaries during the period: No (Indicates whether changes have occurred in specified subsidiaries in accordance with changes in the scope of consolidation)

Newly consolidated — excluded —

(2) Application of special accounting treatment in preparing the quarterly consolidated financial statements: No

(3) Changes in accounting policies, changes in accounting estimates, and restatement of revisions

i Changes in accounting policies with revision of accounting standards
 ii Changes in accounting policies other than the above
 iii Changes in accounting estimates
 iv Restatement of revisions

Note: Starting with the first quarter of this fiscal year, JR East changed its depreciation method. Such changes fall under "Changes in accounting policies that are difficult to distinguish from changes in accounting estimates." For details, please refer to "Changes in Accounting Policies, Changes in Accounting Estimates and Restatement of Revisions" on page 4 in the Attachment.

(4) Number of issued shares (common stock)

i Issued shares at period-end (including treasury stock)	3rd Quarter, Fiscal 2013	396,000,000 shares	Fiscal 2012	400,000,000 shares
ii Treasury stock at period-end	3rd Quarter, Fiscal 2013	602,009 shares	Fiscal 2012	4,431,763 shares
iii Average number of shares during period	3rd Quarter, Fiscal 2013	395,233,428 shares	3rd Quarter, Fiscal 2012	395,568,964 shares

Indication of quarterly review procedure implementation status

These quarterly financial results are not subject to the quarterly review requirements as provided in the Financial Instruments and Exchange Law. The review of quarterly consolidated financial statements as provided in the Financial Instruments and Exchange Law had not been completed as of the date of these Consolidated Financial Results for the Nine-Month Period Ended December 31, 2012.

Explanation of appropriate use of forecasts of business results; other important items

The forecasts of business results and other forward-looking statements in this report are based on information available as of the date of this report and on certain assumptions that JR East viewed as reasonable as of the date of this report. Actual results may differ from such forward-looking statements for a variety of reasons.

Regarding the forecasts of business results, please refer to "Qualitative Information on Consolidated Performance Outlook" on page 3 in the Attachment. Further, the non-consolidated performance outlook is on the next page.

1. Qualitative Information on Quarterly Consolidated Financial Performance

(Unless otherwise stated, all comparisons are between the nine months from April 1, 2012, to December 31, 2012, and the nine months from April 1, 2011, to December 31, 2011.)

(1) Qualitative Information on Consolidated Operating Results

In the first nine months of the fiscal year ending March 31, 2013 (the third quarter), the Japanese economy was initially on a gradual recovery track due to demand primarily from reconstruction efforts following the March 2011 earthquake. In the latter half of the period under review, however, the Japanese economy was adversely affected by slowdowns in overseas economies and other factors, resulting in the continuation of unpredictable and severe conditions. In this uncertain economic environment, the East Japan Railway Company and its consolidated subsidiaries and equity method affiliates (JR East) made efforts to continue generating revenues and improving services through active implementation of various initiatives centered around railway, life-style services and *Suica* operations.

As a result, during the nine months ended December 31, 2012, operating revenues increased 6.3% to ¥2,001.3 billion, due to increases in passenger and other revenues that were attributable mainly to recovery from the effects of the Great East Japan Earthquake in the previous fiscal year. Operating income increased 14.3% to ¥368.2 billion. Furthermore, ordinary income increased 22.1% to ¥304.4 billion, mainly due to a decrease in interest expense. As a result of a decrease in provision for allowance for earthquake-damage losses and other factors, net income rose 77.3% to ¥180.3 billion

Segment Information

Transportation

In the Transportation segment, with railway operations as its core operations, JR East, aiming to further improve safety and customer satisfaction, sought to secure revenues by steadily introducing measures to encourage the use of its Shinkansen network and Tokyo metropolitan area network.

Specifically, with the aim of contributing to the recovery of areas affected by the March 2011 disaster and stimulating tourism in the Tohoku region, JR East continued the Iwate Destination Campaign and the "Ikuze, Tohoku" Campaign to publicize the attractiveness of trips to Tohoku. The Group sought also to stimulate tourism demand by enhancing sales of Tokyo metropolitan area travel products, developing a year-end homecoming campaign, and establishing discount tickets and packaged travel products exclusively for members of Otona no Kyujitsu Club. In addition, the "Shinkansen YEAR 2012" Campaign was launched to implement initiatives such as the limited sale of Osaki ni Tokudane Special early discount passenger tickets to eki-net members to enhance the brand power of the lines and promote their use. Various projects to highlight the attractiveness of Shinkansen travel and attractions along the lines were commenced as part of this campaign. Moreover, JR East launched the "JR SKI SKI" campaign in December 2012, aiming to rekindle young people's interest in snow recreation activities. As for initiatives ensuring safe and reliable transportation, JR East continued to promote the installation of automatic platform gates on the Yamanote Line, the introduction of windbreaks on the Keiyo Line, and the introduction of new railcars to the Takasaki and other lines. Such installations were made in addition to seismic reinforcements in preparation for a possible earthquake directly beneath the Tokyo metropolitan area. Upon the revision of train schedules in September 2012, JR East introduced an additional number of new Series E5 railcars to the Tohoku Shinkansen Line, and increased the speed of the Tsubasa service on the Yamagata Shinkansen Line. Furthermore, JR East renovated four stations in the Sanriku coast area in the Tohoku region, including Miyako Station (Iwate) and Kesennuma Station (Miyagi), and started operating the POKÉMON with YOU train on the Ofunato Line. Hiraizumi Station (Iwate) on the Tohoku Line was opened for use in June 2012 and Kaihimmakuhari Station (Chiba) on the Keiyo Line was renovated, in each case as an "ecoste" model station that incorporates various technologies for preserving the environment.

In October 2012, JR East completed the preservation and restoration work of the Tokyo Station Marunouchi Building, which has been restored as an early Taisho-era building. With the completion of this preservation and restoration work, JR East opened the *JR East Travel Service Center* for travelers visiting Japan, *The Tokyo Station Hotel* (Tokyo), and other facilities to enhance Tokyo Station's attraction as a station displaying a combination of history and modernity.

As a result of the above and other additional factors, such as recovery from the effects of the Great East Japan Earthquake, JR East's railway traffic volume increased as compared to the same period in the previous fiscal year, and the Transportation segment posted a 6.5% increase in operating revenues to ¥1,393.9 billion. Operating income increased 17.5% to ¥270.0 billion.

JR East is coordinating its efforts to restore conventional lines along the northeastern Pacific coast that were damaged by the tsunami caused by the Great East Japan Earthquake with other plans to rebuild the area as a whole and develop towns. To this end, the Group is engaged in discussions with relevant national and local government authorities. Services along the Kesennuma Line were provisionally restored in December 2012 utilizing a BRT (Bus Rapid Transit) system. Efforts are being made to start operating the Ofunato Line with a BRT system in March 2013, while discussions with local authorities on plans to restore the Yamada Line have continued.

Based on lessons learned from the disaster, the Group continued to promote measures for accommodating people unable to return home in the event of a major disruption to public transportation, including a major earthquake. As part of

this effort, 30 major terminal stations were stocked with emergency provisions. JR East also continued to hold talks with relevant municipal authorities on agendas such as disaster procedures for evacuating people to its stations within a 30-kilometer radius of Tokyo. Furthermore, in view of the ongoing shortage of electric power since the March 2011 disaster, JR East continued to implement power conservation measures within stations, railcars and other facilities, while seeking the understanding of its customers.

In March 2012, JR East announced that it had decided to abandon restoration of the Iwaizumi Line as a railway line, the entire line of which was suspended in July 2010 due to a landslide in a section of the line between Oshikado and Iwate-Okawa. JR East plans to continue using buses to fulfill its responsibility to offer transportation services to the region, and is conducting talks with relevant parties in the region to ask for their understanding and cooperation.

Station Space Utilization

In the Station Space Utilization segment, JR East advanced its *Station Renaissance* program, which maximizes the value of spaces within railway stations. In Tokyo Station, the Group fully opened *CentralStreet* (Tokyo) in October 2012. The Group renovated *ecute Shinagawa* (Tokyo) and other commercial facilities within stations to strengthen their competitiveness. Moreover, as part of the *Rediscovering the Region Projects*, JR East held farmers' markets at Ueno and Akihabara stations (Tokyo), among others, that highlighted the appeal of individual areas in Eastern Japan.

As a result of these initiatives and other additional factors, including recovery from the effects of the Great East Japan Earthquake in the previous fiscal year and an increase in revenues at Tokyo Station *GranSta* (Tokyo), the Station Space Utilization segment posted a 3.4% increase in operating revenues to ¥318.1 billion. Operating income increased 14.9% to ¥30.4 billion.

Shopping Centers & Office Buildings

In the Shopping Centers & Office Buildings segment, JR East opened atrévie Higashi-Nakano (Tokyo), CELEO Hachioji North Wing (Tokyo), and CIAL Tsurumi (Kanagawa). In August 2012, GranTokyo North Tower Phase II (Tokyo) was completed, and in September 2012 JR East opened nonowa Nishi-Kokubunji (Tokyo), the first project pursuant to the Chuo Line Mall vision. In addition, the Group remodeled LUMINE Shinjuku (Tokyo), S-PAL Fukushima (Fukushima), Perie Chiba Street (Chiba) and other shopping facilities, while working continually to reenergize existing stores and attract prominent tenants that can draw in customers. Furthermore, the Group opened the JR South Shinjuku Building (Tokyo), and made steady progress in the construction of JR Kanda Manseibashi Building (Tokyo) and JR Otsuka Station South Exit Building (provisional name), which are scheduled for opening during 2013.

As a result of these initiatives and other additional factors, including recovery from the effects of the Great East Japan Earthquake and an increase in revenues from the opening of *LUMINE Yurakucho* (Tokyo) in the previous fiscal year, the Shopping Centers & Office Buildings segment posted a 3.6% increase in operating revenues to ¥184.8 billion. Operating income increased 0.7% to ¥52.8 billion.

Others

In Hotel operations, JR East opened *The Tokyo Station Hotel* (Tokyo) and remodeled the banquet halls at various Group hotels, including *Hotel Metropolitan Edmont* (Tokyo). In advertising and publicity services, JR East continued to promote sales of advertising on *J-AD Vision*, an advertising medium at stations that uses large LCD screens, and *Train Channel*, an advertising medium for showing video commercials in trains. In credit card operations, the Group began a new service named *View Thanks Bonus* for holders of qualifying cards who can earn bonus points in proportion to their yearly credit card usage, while developing campaigns to promote card usage tied to various events. In *Suica* shopping services (electronic money), JR East actively made efforts to expand its affiliated store network in markets beyond railways stations, including with the launch of settlement services at some Ito-Yokado stores within the Tokyo metropolitan area, and DiverCity Tokyo Plaza, among other commercial facilities and services. As a result, *Suica* electronic money was usable at approximately 195,670 stores as of December 31, 2012. In other service operations, the segment opened *JeXer FITNESS CLUB & SPA Shinjuku* (Tokyo) and *Fitness Lounge THE JEXER TOKYO* (Tokyo).

As a result of these initiatives and other additional factors, such as increased revenues in advertising and publicity services among other businesses due to recovery from the effects of the Great East Japan Earthquake, and as a result of consolidation of Japan Transport Engineering Company as a new subsidiary, Others posted a 8.6% increase in operating revenues to ¥386.9 billion. Operating income increased 17.8% to ¥13.8 billion.

Note: JR East applies the Accounting Standard for Disclosures about Segments of an Enterprise and Related Information (Accounting Standards Board of Japan Statement No.17, June 30, 2010) and the Guidance on Accounting Standard for Disclosures about Segments of an Enterprise and Related Information (Accounting Standards Board of Japan Guidance No.20, March 21, 2008). The operating income of each segment of JR East corresponds to the segment income under the said Accounting Standard and Guidance.

(2) Qualitative Information on Consolidated Performance Outlook

Based on its experience from the Great East Japan Earthquake, JR East has reaffirmed the importance of its role and mission. In view of the foregoing and the major operating environment changes in the aftermath of the earthquake as well as various other considerations, in October 2012 JR East formulated a new management vision entitled "JR East Group

Management Vision V — Ever Onward." Under this management vision, JR East will unite as a Group in enacting initiatives, and pioneer a new future in partnership with local communities.

In railway operations, JR East is working continually to implement earthquake countermeasures in preparation for conceivable earthquake scenarios such as an earthquake directly beneath the Tokyo metropolitan area, by making both tangible and intangible efforts, in order to build a railway capable of withstanding natural disasters. At the same time, JR East is advancing safety measures such as installation of automatic platform gates on the Yamanote Line. Following the revision of train schedules in March 2013, JR East will operate the Hayabusa service on the Tohoku Shinkansen Line at a maximum speed of 320km/h, the fastest in Japan, and introduce the new Series E6 railcars as the Super Komachi service on the Akita Shinkansen Line, which will shorten travel times. On conventional lines, the Group will increase service frequency on the Musashino Line and expand service between the Yokohama and Negishi lines to enhance the convenience of the "Tokyo Megaloop." JR East plans to resume operations on some sectors of coastal lines that were damaged by the earthquake, including between Hamayoshida and Watari on the Joban Line and between Watanoha and Urashuku on the Ishinomaki Line. To further stimulate tourism, JR East will promote GranClass (first class) ridership on the Tohoku Shinkansen Line's Series E5 railcars, step up the development of ski campaigns, and continually develop tourism campaigns destined primarily for the Tohoku region. In addition, JR East will strengthen initiatives aimed at expanding the membership of Otona no Kyujitsu Club and prompting existing members to use its services more often. Moreover, JR East will promote energy creation and conservation under a Group-wide energy and environmental strategy, as well as engage in initiatives that include R&D for introducing smart grid technologies to train power systems. In addition, JR East is preparing to commercialize a storage battery train system on the Karasuyama Line from the spring of 2014.

In the life-style business, JR East will make steady progress toward completion of the *Tokyo Station City* project, including *Gran Roof* (Tokyo) scheduled to be completed by fall 2013. The segment will also seek to expand earnings and enhance the competitive power of its business, including by completing the *JR Kanda Manseibashi Building* (Tokyo) in January 2013. In addition, JR East will continue and strengthen initiatives in collaboration with local communities, such as the development of farmers' markets for highlighting their appeal, and the opening of *COTONIOR Kichijoji* (Tokyo), a complex that supports both childcare and welfare for the elderly.

In *Suica* operations, JR East will start providing on March 23, 2013 a mutual usage service network across all 10 transportation-company IC card networks currently in use in Japan, thereby further enhancing customer convenience. At the same time, JR East will seek to expand the number of stores accepting *Suica* electronic money while promoting its usage.

Having reviewed the operating results through the third quarter ended December 31, 2012, JR East has decided not to revise its consolidated forecasts for the fiscal year ending March 31, 2013, previously announced on October 30, 2012.

2. Notes to Summary Information (Other)

(1) Changes in Accounting Policies, Changes in Accounting Estimates and Restatement of Revisions

(Changes in accounting policies that are difficult to distinguish from changes in accounting estimates)
Following the revision of the Corporation Tax Law, from the first quarter of this fiscal year, JR East began applying a depreciation method based on the revised Corporation Tax Law to property, plant and equipment acquired since April 1, 2012. The impact on consolidated financial statements as a result of this change is minimal.

(5) Notes on Significant Changes in the Value of Shareholders' Equity (Unaudited)

JR East cancelled 4,000,000 shares of treasury stock on November 5, 2012, in accordance with a resolution of the Board of Directors meeting held on October 30, 2012. The book value of the treasury stock of ¥23,106 million, ¥13 million of which was deducted from capital surplus and ¥23,093 million of which was deducted from retained earnings.

(6) Additional Information (Unaudited)

JTB Corp., an equity-method affiliate of JR East, absorbed JTB Estate Corp. by merger on April 1, 2012. Prior to this absorption merger, JTB Estate Corp. had been revaluating its land for business use pursuant to the Law on Revaluation of Land (Law No. 34 of 1998) and Law for Partial Revision of the Law on Revaluation of Land (Law No. 19 of 2001). Consequently, JR East's equity-method portion of "Revaluation reserve for land" recorded on JTB Corp.'s balance sheets was recorded in JR East's Consolidated Balance Sheets as "Revaluation reserve for land" under NET ASSETS, Accumulated Other Comprehensive Income.
