### Revision History

Revision number	Date of Issue	Remarks
0	27 December 2024	Initial

### Disclaimer

Our assessment relies on the premise that the data and information provided by Fundraiser to us as part of our review procedures have been provided in good faith. Because of the selected nature (sampling) and other inherent limitation of both procedures and systems of internal control, there remains the unavoidable risk that errors or irregularities, possibly significant, may not have been detected. Limited depth of evidence gathering including inquiry and analytical procedures and limited sampling at lower levels in the organization were applied as per scope of work. DNV expressly disclaims any liability or co-responsibility for any decision a person or an entity may make based on this Statement.

### Statement of Competence and Independence

DNV applies its own management standards and compliance policies for quality control, in accordance with ISO/IEC 17021:2011 - Conformity Assessment Requirements for bodies providing audit and certification of management systems, and accordingly maintains a comprehensive system of quality control, including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements. We have complied with the DNV Code of Conduct<sup>1</sup> during the assessment and maintain independence where required by relevant ethical requirements. This engagement work was carried out by an independent team of sustainability assurance professionals. DNV was not involved in the preparation of statements or data included in the Framework except for this Statement. DNV maintains complete impartiality toward stakeholders interviewed during the assessment process.

---

<sup>1</sup> DNV Code of Conduct is available from DNV website ([www.DNV.com](http://www.DNV.com))

## I . Scope and Objectives

East Japan Railway Company (hereinafter, “JR East”) has commissioned DNV Business Assurance Japan (hereinafter, “DNV”) to conduct a periodic review of its Sustainability Bond (6th Sustainability Bond, hereinafter “the Bond”).

The objective of the periodic review of DNV is to conduct an assessment to confirm that the Bond meets the criteria such as the Sustainability Bond Guidelines (ICMA 2021, hereinafter “SBG”) the Green Bond Principles (ICMA 2021, hereinafter “GBP”), the Green Bond Guidelines (Ministry of the Environment 2022, hereinafter “GBGL”), the Social Bond Principles (ICMA 2021, hereinafter “SBP”), and the Social Bond Guidelines (Financial Services Agency 2021, hereinafter “SBGL”), which will be described later, and to provide a second party opinion on the eligibility of the Bond.

JR East issued the 6th Sustainability Bond (unsecured straight bond) of JPY 10 billion on 19 January 2024. DNV conducted a periodic review for the period from the issuance of the Bond to November 2024 based on the SBG, GBP/GBGL, and SBP/SBGL.

DNV, as an independent external reviewer, identified no real or perceived conflict of interest associated with the delivery of this second party opinion for JR East.

In this paper, no assurance is provided regarding the financial performance of the Bond, the value of any investment in the Bond, or the long-term environmental benefits of the transaction.

### Standards/guidelines to be applied

No.	Standards/Guidelines	Scheme owner	Applied level <sup>*1*2</sup>
1.	Sustainability Bond Guidelines (SBG)	International Capital Market Association (ICMA), 2021	Apply
2.	Green Bond Principles (GBP)	International Capital Market Association (ICMA), 2021	Apply
3.	Green Bond Guidelines (GBGL)	Ministry of the Environment, 2022	Apply
4.	Social Bond Principles (SBP)	International Capital Market Association (ICMA), 2021	Apply
5.	Social Bond Guidelines (SBGL)	Financial Services Agency, 2021	Apply
6.	Climate Bonds Standard version 3.0 (CBSv3.0) (Sector criteria)	Climate Bonds Initiative, 2019	Refer (applicable technical standards)
7.	Green and Social Bonds: A High-Level Mapping to the Sustainable Development Goals	International Capital Market Association (ICMA), 2022	Refer
8.	Handbook Harmonised Framework for Impact Reporting	International Capital Market Association (ICMA), 2020	Refer

\*1 Apply: Eligibility for all four core common elements to each principle and guideline was assessed.

\*2 Refer: Based on the Sustainability Bond projects and implementation plans, relevant contents were partially considered.

## II. Responsibilities of JR East and DNV

The management of JR East has provided the information and data used by DNV during the delivery of this review.

DNV's second party opinion represents an independent opinion and is intended to inform JR East and other interested stakeholders in the allocated Sustainability Bond of whether the established criteria have been met, based on the information provided to us.

In our work, we have relied on the information and the facts presented to us by JR East. DNV is not responsible for any aspect of the nominated assets referred to in this opinion and cannot be held liable if estimates, findings, opinions, or conclusions are incorrect.

Thus, DNV shall not be held liable if any of the information or data provided by the management of JR East and used as a basis for this assessment were not correct or complete.

## III. Basis of DNV's Opinion

To provide as much flexibility for the issuer, JR East, as possible, DNV has adapted JR East Sustainability Bond assessment methodology, which incorporates the requirements of the SBG, GBP/GBGL, and SBP/SBGL to create a Sustainability Bond Eligibility Assessment Protocol (hereinafter, "DNV's Protocol"). Please refer to Schedule-2. The Protocol is applicable to Sustainability Bond under the SBP, GBP/GBGL, and SBP/SBGL.

DNV's Protocol includes a set of suitable criteria that can be used to underpin DNV's opinion. The overarching principle behind the criteria is that the Sustainability Bond should "enable capital-raising and investment for new and existing projects with environmental and social benefits."

As per our Protocol, the criteria against which the Sustainability Bond has been reviewed are grouped under the four Principles:

- **Principle One: Use of Proceeds**

The Use of Proceeds criteria are guided by the requirement that a Sustainability Bond issuer must use the funds raised to finance eligible activities. The eligible activities should produce clear environmental and social benefits.

- **Principle Two: Process for Project Evaluation and Selection**

The Project Evaluation and Selection criteria are guided by the requirements that a Sustainability Bond issuer should outline the process it follows when determining eligibility of an investment using Sustainability Bond proceeds and outline any impact objectives it will consider.

- **Principle Three: Management of Proceeds**

The Management of Proceeds criteria are guided by the requirements that the Sustainability Bond should be tracked within the issuing organization, that separate

portfolios should be created when necessary and that a declaration of how unallocated funds will be handled should be made.

- **Principle Four: Reporting**

The Reporting criteria are guided by the recommendation that at least Sustainability Reporting to the bond investors should be made of the use of bond proceeds and that quantitative and/or qualitative performance indicators should be used, where feasible.

## **IV. Work Undertaken**

Our work constituted a high-level review of the available information, based on the understanding that this information was provided to us by JR East in good faith. We have not performed an audit or other tests to check the veracity of the information provided to us. The work undertaken to form our opinion included:

### **i. Pre-Issuance Assessment of Sustainability Bond (\* not included in this report)**

- Creation of a JR East specific Protocol, adapted to the purpose of the Sustainability Bond, as described above and in Schedule-2 to this assessment;
- Assessment of documentary evidence provided by JR East on the Bond and supplemented by high-level desktop research. These checks refer to current assessment best practices and standards methodology;
- Discussions with JR East, and review of relevant documentation;
- Documentation of findings against each element of the criteria.

### **ii. Post-Issuance Assessment of Sustainability Bond \*This Report**

- Assessment of evidential documents provided by JR East after issuance of the Sustainability Bond, and supplemental assessment by desk review from a higher perspective;
- Interview with key personnel of JR East, and review of the relevant documentation;
- Field research and inspection (if necessary);
- Review of the nominated projects and assets at the time of the post-issuance verification (update of the details mentioned in Schedule-1);
- Document creation of post-issuance assessment result.

## V. Findings and DNV's Opinion

DNV's findings and opinion are listed below:

### Principle One: Use of Proceeds

DNV has confirmed that, as of December 2024, JR East had allocated the all proceeds from the 6th Sustainability Bond to the following projects:

#### 1. E235 series railcars (Yokosuka/Sobu Rapid Line Service) ... JPY 0.4 billion allocated (6th Sustainability Bond)

This project is to manufacture and introduce a new type of railcars that combine improved environmental friendliness through the latest energy-saving technologies, improved operational stability through the use of dual systems for major equipment and the latest condition monitoring functions, and improved comfortability by introducing wider seats (see Figure-1). DNV has confirmed that the entire amount was newly allocated to this project and that the project is progressing smoothly.

Figure-1 Exterior of an E235 series railcar

#### 2. Railway facilities (renewal of interlocking equipment) ... JPY 9.5 billion allocated (6th Sustainability Bond)

This project is one of the “mechanisms” to realize safety, which is one of the top priorities in the JR East Group Management Vision “Move Up” 2027, and is an interlocking equipment renewal project, which is one of the essential facilities for the safe operation of clean transportation railway (see Figure-2).

DNV has confirmed that the entire amount was allocated to this project as refinancing and that the project has been completed as planned.

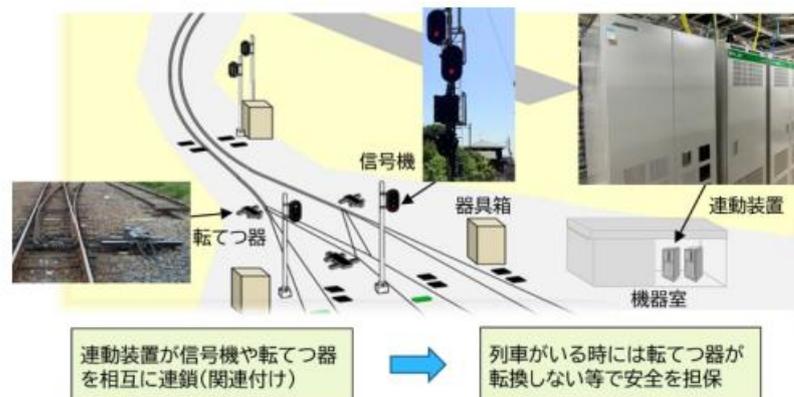

Figure-2 Interlocking equipment

## **Principle Two: Process for Project Evaluation and Selection**

Through the review, DNV has confirmed that the nominated sustainability projects listed in Schedule-1 are in compliance with the goals of the JR East Group Management Vision “Move Up” 2027, the “Energy Vision 2027 – Connect” based on the vision, and the long-term environmental goal “Zero Carbon Challenge 2050,” which are related to clean transportation and climate change adaptation, etc. contributing to CO<sub>2</sub> emission reduction, and that they have been evaluated and selected through appropriate prescribed processes at the Finance & Investment Planning Department and relevant internal departments of JR East.

Specifically, the Finance & Investment Planning Department selects eligible projects based on a comprehensive analysis and review of financial aspects, technical and operational aspects, market environment, and ESG risks, and the Director in charge of Finance & Investment Planning makes the final decision.

As for the environmental and social impact of investments and business operations, DNV has confirmed that the Group company/department in charge of the project identifies and assesses risks in line with the company-wide risk management system and under the management of the Corporate & Legal Strategies Department before the implementation of investment or business to reduce risks or take other measures where necessary, and that a system has been established to ensure that the proceeds of Sustainability Bond etc. are not allocated to projects related to the following:

- Transactions that do not comply with the laws and regulations of the country in which they take place, including laws in relation to unfair business practices, bribery, corruption, extortion, and embezzlement.

### Principle Three: Management of Proceeds

DNV has confirmed how JR East has managed the proceeds since the issuance of the Bond until November 2024. The allocation status of proceeds is shown in Table-1 in Principle Four.

DNV has confirmed that the net proceeds are managed on a quarterly basis by the Finance & Investment Planning Department of JR East, which prepares a dedicated management sheet and manages the allocation status until the proceeds are fully allocated.

DNV has confirmed that JR East had fully allocated the net proceeds from the 6th Sustainability Bond to each eligible project as planned as of November 2024.

Note as mentioned earlier that no assurance is provided regarding the financial performance of the Bond, the value of any investment in the Bond, or the long-term environmental and social benefits of the transaction.

### Principle Four: Reporting

DNV has confirmed that JR East plans to disclose the allocation status of proceeds and the environmental and social benefits on its website. According to its Framework, the allocation status of proceeds will be reported until the proceeds are fully allocated, and the environmental and social benefits will be reported at least until the completion of allocation of the proceeds.

Through periodic reviews, DNV has confirmed that the environmental and social benefits brought about by the Sustainability Bond have been properly calculated using the method set out by JR East prior to the issuance of the Bond, and that the environmental and social benefits were obtained as planned.

The following tables show the allocation status of proceeds and the environmental and social benefits of the Bond in the period up to 30 September 2024.

#### <Allocation status>

DNV has confirmed that the net proceeds from the 6th Sustainability Bond (unsecured straight bond) were fully allocated as planned, as shown in Table-1.

Table-1 Allocation status of proceeds from the 6th Sustainability Bond (unsecured straight bond)

Eligible projects	GBP Category	SBP Category	Amount of proceeds	Allocated amount		Unallocated amount
				Refinancing	New investment	
E235 series railcars (Yokosuka/Sobu Rapid Line Service)	Clean transportation	Affordable basic infrastructure	JPY 9.9 billion	—	JPY 0.4 billion	—
Renewal of interlocking equipment	Clean transportation	—		JPY 9.5 billion	—	—

Total amount		JPY 9.9 billion (fully allocated)	—
--------------	--	--------------------------------------	---

**<Environmental and social benefits>**

DNV has confirmed the below as of December 2024.

- The E235 series railcars are progressing smoothly as originally planned, and that introduced railcars are operating smoothly and the environmental benefits are being obtained.
- Renewal of interlocking equipment has progressed and started operation as planned, contributing to the safe operation of clean transportation facilities.

Table-2 Environmental and social benefits

Eligible projects	Environmental and social benefits		
	Category	Impact indicators	Achievement
E235 series railcars (Yokosuka/Sobu Rapid Line Service)	Common	Record of introducing railcars	Introduced: 83 railcars
	Green	Energy-saving by using VVVF inverter etc. (vs. conventional products)	19.8% energy-saving* <sup>1</sup>
		Energy-saving by using LED lighting (vs. conventional fluorescent lighting)	40% energy-saving
	Social	Number of railcars equipped with emergency power supplies	43 railcars
		Number of railcars with space for wheelchairs	83 railcars
		Number of railcars with barrier-free restrooms	83 railcars
Renewal of interlocking equipment	Green	Details of maintenance, renovation, and renewal of railroad facilities (FY2021)* <sup>2</sup>	Renewal of interlocking equipment In use: 19 stations

\*1 In the case of the Yamanote Line E235 series (energy consumption varies depending on the line section and running pattern)

\*2 Actual results of FY2021 are disclosed as it was allocated as refinancing to the investment in FY2021.

## VI. Assessment Conclusion

On the basis of the information provided by JR East and the work undertaken, it is DNV's opinion that JR East meets the criteria established in the Protocol and that it is aligned with the stated definition or purpose of the Sustainability Bond within the SBG, GBP/GBGL, and SBP/SBGL, which is to "enable capital-raising and investment for new and existing projects with environmental and social benefits."

### About DNV

Driven by our purpose of safeguarding life, property and the environment, DNV enables organisations to advance the safety and sustainability of their business. Combining leading technical and operational expertise, risk methodology and in-depth industry knowledge, we empower our customers' decisions and actions with trust and confidence. We continuously invest in research and collaborative innovation to provide customers and society with operational and technological foresight. With our origins stretching back to 1864, our reach today is global. Operating in more than 100 countries, our 16,000 professionals are dedicated to helping customers make the world safer, smarter and greener.

#### Disclaimer

Responsibilities of the Management of the Fundraiser and the Second-Party Opinion Providers, DNV : The management of Fundraiser has provided the information and data used by DNV during the delivery of this review. Our statement represents an independent opinion and is intended to inform the Fundraiser management and other interested stakeholders in the Bond as to whether the established criteria have been met, based on the information provided to us. In our work we have relied on the information and the facts presented to us by the Fundraiser. DNV is not responsible for any aspect of the nominated assets referred to in this opinion and cannot be held liable if estimates, findings, opinions, or conclusions are incorrect. Thus, DNV shall not be held liable if any of the information or data provided by the Fundraiser's management and used as a basis for this assessment were not correct or complete

## Schedule-1 Sustainability Bond Allocation Projects

The green and social projects listed in the table are those allocated after the financing has been implemented.

### Green Projects

No.	Allocation projects	Overview of nominated eligible projects in East Japan Railway Company Sustainability Finance Framework				Expected environmental contribution
		Green eligible projects		Project overview		
		Category	Sub Category			
1	E235 series railcars (Yokosuka/Sobu Rapid Line Service)	Clean transportation	Overall rail transportation (sections of trains, storage battery-driven trains, or hybrid railcars)	Railcars	<ul style="list-style-type: none"> <li>Investments in relation to manufacturing, renovation, or renewal of railcars powered by electricity</li> <li>Investments in relation to manufacturing, renovation, or renewal of hybrid railcars with CO<sub>2</sub> emissions below 50 g-CO<sub>2</sub>/person-km or 25 g-CO<sub>2</sub>/ton-km</li> <li>Research and development of next-generation railcars such as hydrogen hybrid electric trains</li> </ul>	GHG emission reduction from railway operations
2	Railway facilities (renewal of interlocking equipment)			Railway facilities	<ul style="list-style-type: none"> <li>Investments (Capex) and expenses (Opex) for the maintenance, renovation, and renewal of facilities essential to rail operations, such as tracks, signals, stations, and depots.</li> </ul>	

## Social Projects

No.	Allocation projects	Overview of nominated eligible projects in East Japan Railway Company Sustainability Finance Framework				
		Social eligible projects		Project overview	Expected social contribution	
		Category	Sub Category		Beneficiary	Contribution to society
1	E235 series railcars (Yokosuka/Sobu Rapid Line Service)	Affordable basic infrastructure	Railcars	<ul style="list-style-type: none"> <li>Ensure a space for wheelchairs passengers in each railcar</li> <li>Install a large accessible restroom in each railcar</li> </ul>	<ul style="list-style-type: none"> <li>Persons with disabilities</li> <li>Senior</li> <li>Pregnant</li> <li>Children and families with children</li> <li>All railway users including above</li> </ul>	<ul style="list-style-type: none"> <li>Ensuring mobility opportunities for socially vulnerable people</li> <li>Improving safety and comfort for all railway users</li> </ul>

## Schedule-2 Sustainability Bond Eligibility Assessment Protocol

The following checklists (1) to (4) are DNV's Sustainability Bond Eligibility Assessment Protocol created for JR East based on the requirements of SBG, GBP, SBP, and GBGL. The “Confirmed documents” in the work undertaken include internal documents of JR East and are provided by JR East as evidence of eligibility judgement for DNV.

The East Japan Railway Company Sustainability Finance Framework and related legal documents described in the table have been separately disclosed as explanatory materials for investors.

### (1) Use of Proceeds

Ref.	Criteria	Requirements	Work Undertaken	DNV Findings
1a	Type of bond	The Sustainability Bond must fall in one of the following categories, as defined by SBP and GBP.  - (Standard) Sustainability Bond - Sustainability Revenue Bond - Sustainability Project Bond - Sustainability Security Bond	Confirmed documents: • East Japan Railway Company Sustainability Finance Framework (hereinafter, the “Framework”) Interviews with JR East	Through the documentation review and consultation, DNV has confirmed that JR East’s Sustainability Bond falls into the following categories:  (Standard) Sustainability Bond
1b	Project Categories	The cornerstone of the Sustainability Bond is the utilization of the proceeds of the finance which should be appropriately described in the legal documentation for the security.	Confirmed documents: • Framework • Assessment documentation Interviews with JR East	DNV has confirmed that the proceeds have been allocated to the following projects:  <E235 series railcars (Yokosuka/Sobu Rapid Line Service)> - Green: Clean transportation (overall rail transportation) - Social: Affordable basic infrastructure (railcars)  <Renewal of interlocking equipment> - Green: Clean transportation (overall rail transportation)
1c	Environmental and social benefits	All designated Sustainability Project categories should provide clear greenly and/or social benefits, which, where	Confirmed documents: • Framework • Assessment documentation Interviews with JR East	DNV has confirmed that the green projects contribute to the reduction of CO <sub>2</sub> emissions from railway operations. As for the sustainability project, DNV assessed it as having sufficient benefits to improve social issues as it enhances the convenience of

Ref.	Criteria	Requirements	Work Undertaken	DNV Findings
		feasible, will be quantified or assessed by the fundraiser.		public transportation (railways) for a wide range of railway users, including the elderly and wheelchair users, taking into account the background to the enactment of the relevant legislation (the Barrier Free Act) and the actual implementation state of accessible/universal design.
1d	Refinancing share	In the event that a proportion of the proceeds may be used for refinancing, it is recommended that fundraiser provide an estimate of the share of financing vs. refinancing, and where appropriate, also clarify which investments or project portfolios may be refinanced.	Confirmed documents: <ul style="list-style-type: none"> <li>• Framework</li> <li>• Assessment documentation</li> </ul> Interviews with JR East	DNV has confirmed that JR East had used most of the net proceeds for both new investments and refinancing for one or more of the eligible projects at the end of September 2024. DNV has also confirmed that JR East intends to identify, through reporting (annual reporting), the estimated amount of the allocated proceeds.

## (2) Process for Project Evaluation and Selection

Ref.	Criteria	Requirements	Work Undertaken	DNV Findings
2a	Investment decision process	<p>The fundraiser of the Sustainability Bond should outline the decision-making process it follows to determine the eligibility of projects using Sustainability Bond proceeds. This includes, without limitation:</p> <ul style="list-style-type: none"> <li>• A process to determine how the projects fit within the eligible Sustainability (Green and Social) Projects categories identified in the Sustainability Bond Principles;</li> <li>• The criteria making the projects eligible for using the Sustainability Bond proceeds; and</li> <li>• The sustainability objectives for green and social</li> </ul>	<p>Confirmed documents:</p> <ul style="list-style-type: none"> <li>• Framework</li> <li>• Assessment documentation</li> <li>• Website</li> </ul> <p>Interviews with JR East</p>	<p>DNV has confirmed that JR East has selected eligible projects for the Sustainability Bond etc. in accordance with the Framework and internal regulations. Specifically, the procedure is as follows:</p> <ul style="list-style-type: none"> <li>- The Finance &amp; Investment Planning Department selects eligible projects and the Director in charge of Finance &amp; Investment Planning gives approvals.</li> <li>- In assessing the eligibility of the projects, a comprehensive analysis and review of financial aspects, technical and operational aspects, market environment, and ESG risks should be undertaken.</li> </ul>
2b	Fundraiser's environmental and social governance framework	<p>In addition to criteria and certifications, the information published by fundraiser regarding the Sustainability Bond process is also considered the quality of performance of the fundraiser's framework and environmental and social sustainability.</p>	<p>Confirmed documents:</p> <ul style="list-style-type: none"> <li>• Framework</li> <li>• Assessment documentation</li> <li>• Website</li> </ul> <p>Interviews with JR East</p>	<p>DNV has confirmed, through the documentation review etc., that the planned Sustainability Bond etc. are in line with JR East's business and environmental initiatives such as "Move Up" 2027, the "Energy Vision 2027 - Connect," "Zero Carbon Challenge 2050," etc., and are closely related to the business and environmental sustainability.</p>

### (3) Management of Proceeds

Ref.	Criteria	Requirements	Work Undertaken	DNV Findings
3a	Tracking procedure-1	Proceeds for funds raised through the Sustainability Bond should be managed in sub-accounts, incorporated into sub-portfolios, or tracked by other appropriate means. They should also be evidenced by the fundraiser in a formal internal process related to the fundraiser's investment and financing operations for sustainability projects.	Confirmed documents: <ul style="list-style-type: none"> <li>• Framework</li> <li>• Assessment documentation</li> </ul> Interviews with JR East	DNV has confirmed that JR East managed the proceeds from the Sustainability Bond etc. in cash or cash equivalents, and that the allocation status is managed by the Finance & Investment Planning Department on a quarterly basis until the proceeds are fully allocated. The system for managing the allocation status is stipulated in the internal document.
3b	Tracking procedure-2	In the period for which the Sustainability Bond is to be managed, the balance of the tracked proceeds should be periodically adjusted by amounts matching eligible project investments or loan disbursements made during that period.	Confirmed documents: <ul style="list-style-type: none"> <li>• Framework</li> <li>• Assessment documentation</li> </ul> Interviews with JR East	DNV has confirmed that the allocation status of proceeds (allocated amount and balance) is managed and adjusted according to the above procedure. DNV has also confirmed that JR East uses the codes registered in the accounting system to manage expenditure on eligible projects, track the allocation status of proceeds in a separate spreadsheet, and manages the unallocated and allocated proceeds on a quarterly basis using a balance sheet.
3C	Temporary holdings	Pending such investments or disbursements to eligible Sustainability Projects, the fundraiser should make known to investors the intended types of temporary investment instruments for the balance of unallocated proceeds.	Confirmed documents: <ul style="list-style-type: none"> <li>• Framework</li> <li>• Assessment documentation</li> </ul> Interviews with JR East	DNV has confirmed that JR East has disclosed the allocation status of proceeds on its website on an annual basis until the proceeds of the Sustainability Bond etc. are fully allocated. The disclosure includes the amount of allocated proceeds on a project-by-project basis, the allocated amount of proceeds, and the amount allocated to refinancing. DNV has also confirmed that the progress of the project and the environmental and social benefits are published on its website on an annual basis until the allocation is completed.

#### (4) Reporting

Ref.	Criteria	Requirements	Work Undertaken	DNV Findings
4a	Periodical reporting	<p>In addition to reporting on the use of proceeds and the temporary investment of unallocated proceeds, fundraisers should provide at least annually a list of projects to which the Sustainability Bond proceeds have been allocated including:</p> <ul style="list-style-type: none"> <li>• confidentiality and/or competitive considerations, where possible;</li> <li>• a brief description of the projects and the amounts disbursed, as well as the expected environmental and social sustainable impact</li> </ul>	<p>Confirmed documents:</p> <ul style="list-style-type: none"> <li>• Framework</li> <li>• Assessment documentation</li> </ul> <p>Interviews with JR East</p>	<p>DNV has confirmed that JR East plans to organize each time of issuance and report annually on the allocation status of proceeds from the Sustainability Bond etc. until the proceeds are fully allocated, and the environmental and social benefits until the allocation is completed.</p> <p>The reporting discloses the following information as far as practicable per eligible project category or per eligible project:</p> <p><b>【Allocation status】</b></p> <ul style="list-style-type: none"> <li>- Allocated amount</li> <li>- Unallocated amount</li> <li>- Refinancing amount</li> </ul> <p><b>【Impact reporting】</b></p> <p>&lt;Green projects&gt;</p> <ul style="list-style-type: none"> <li>- Record of introducing trains, storage battery-driven trains, or hybrid railcars.</li> <li>- Energy-saving by using VVVF inverter etc. (designed value)</li> <li>- Details of maintenance, renovation, and renewal of equipment essential for railway operations, and disaster countermeasures (railway facilities) etc.</li> </ul> <p>&lt;Social projects&gt;</p> <ul style="list-style-type: none"> <li>- Record of introducing railcars</li> <li>- Number of railcars with wheelchair spaces and barrier-free spaces etc.</li> </ul>
